

Are You Ready for a Cyber Attack? – We Bet You’re Not And Here’s Why

Yahoo was the victim of the largest data breach in 2016, when over 500 million user records were stolen.

Large companies aren’t the only businesses vulnerable to a cyber attack. Small businesses and independent consultants can be attacked too.

In fact, according to the Verizon Data Breach Investigations Report, 61 percent of data breach victims in 2016 were businesses with less than 1,000 employees.

“There are two kinds of companies. Those that have been hacked and those that don’t know yet that they’ve been hacked,” says former FBI Director James Comey.

There are ways to help safeguard your company – you can train employees, stress test your networks and stay compliant with state and local laws. Having Cyber and Data Breach Insurance in place can also significantly reduce the financial implications of a cyber attack.

Gallagher Affinity has partnered with NHMR to provide comprehensive Cyber and Data Breach Insurance coverage and low premiums to NHMR members. Large organizations, small businesses and independent consultants can purchase Cyber and Data Breach Insurance to cover the potential cost of a cyber attack.
